BLUALIEN — Complete Website Specification

A comprehensive content, information architecture, UX and visual-direction document for the Blualien company website.

Core principle: Blualien must feel like an AI-native company and ecosystem—not simply a digital agency.

1. Core Positioning

Primary brand line

Building what comes next.

Company description

Blualien is an AI-native company building products, creative systems, technology and media around the technologies reshaping how people work, create and build.

The website must answer

1. What is Blualien?
2. What is Blualien building?
3. What can Blualien do for a company?
4. What is Blualien publishing and exploring?
5. How can someone work with, join, follow, or partner with Blualien?

2. Main Navigation

- Company
- Products
- Studio
- Orbit
- Labs
- About
- Primary CTA: Work with us

Keep the navbar minimal. Optional utility actions: Menu and Search.

3. Homepage

3.1 Hero

Headline: Building what comes next.

Copy: Blualien builds AI-native products, creative systems and media around the technologies reshaping how people work, create and build.

- Explore Blualien →
- See what we're building →

Visual: minimal animated environment using typography, subtle motion and restrained futuristic elements. Avoid a cheesy alien mascot.

3.2 What is Blualien?

Headline: One company. Multiple ways to build.

Products

AI-native products solving real problems. Feature ALINET prominently.

Studio

AI-native creative and growth systems for companies.

- AI creative production
- Product photography
- Model photography
- Story-driven ads
- Branding
- Websites
- Apps
- Social media
- Performance marketing

Distribution

Media built around ideas worth knowing.

- @thegararushil — AI • Business • Startups • Technology
- Alien's Orbit — Culture • Technology • Business • Startups • Internet
- Beyond 100X — AI education • engineering • future of work

Labs

Experiments, prototypes and things Blualien is exploring.

- AI experiments
- Prototypes
- Internal tools
- Research
- Hackathon projects
- Future products

3.3 What we're building

ALINET — The professional network for creative talent.

ALINET is a work-first professional network where creative professionals build their identity and reputation through what they actually create, while companies discover, evaluate and hire people based on professional proof.

Status: Building. CTA: Explore ALINET →

3.4 What we're working on

Show current experiments and product work. Status labels: Live, Building, Exploring, Archived.

3.5 What we're creating

Highly visual Studio work and case studies. Candidates: Drink Niro, Khet Perfumes, UNKNWN and future verified client work.

Only publish real work and real results. Never fabricate numbers.

3.6 What we're thinking about

Feature Alien's Orbit and the Blualien Journal.

3.7 Who is building it

- Rushil Gara — Founder — AI • startups • technology • business
- COO — Operator — Business • strategy • companies • operations

Do not artificially inflate team size.

3.8 Final CTA

Headline: Have something worth building?

- I'm a company → I want to work with Blualien
- I'm a creator → I want to build with Blualien
- I'm a builder → I want to join the team
- I'm an investor / partner → I want to talk

4. Products — /products

Hero: We build products for the world we're moving toward.

ALINET

The professional network for creative talent.

Work-first professional identity and reputation built around actual creative proof. Status: Building.

Speqr

AI-native product intelligence for product teams. Status: Exploring / Parked.

Future products

More things are being built.

5. Studio — /studio

Hero: AI-native creative systems for ambitious companies.

We combine creative direction, storytelling, technology and AI to help companies create better content, campaigns and digital experiences faster.

Creative

- AI Product Photography
- AI Model Photography
- Story-driven Video
- Creative Direction

Growth

- Social Media
- Instagram as a Service
- LinkedIn Marketing
- Performance Marketing
- Email Campaigns

Digital

- Websites
- Web Apps
- Branding

Why Blualien?

AI is the infrastructure. Creativity is the advantage.

- Think first — Creative direction before generation.
- Build faster — AI-native workflows reduce production friction.
- Make it matter — Output must communicate, sell, entertain or build a brand.

6. Work / Case Studies — /work

Make this page visual and editorial, not a generic agency portfolio.

Every case study: Client → Problem → Idea → What we built → Result → Services.

- Drink Niro — Premium Indian beverage campaign
- Khet Perfumes — Premium product storytelling
- UNKNWN — Fashion / product / brand creative

CTA per project: View case study →

7. Orbit — /orbit

Hero: The internet is full of things worth knowing.

Alien's Orbit explores technology, business, startups, culture, creativity and the strange ideas shaping the future.

Content categories

- AI
- Technology
- Startups
- Business
- Culture
- Creators
- Internet
- Future of Work

Core identity: Discover something you didn't know you needed to know.

8. Founder / Distribution

Headline: Inside Blualien. Follow the people building it.

Rushil

Founder — AI • startups • technology • business. @thegararushil

COO

Operator — Business • strategy • companies • operations.

The two creator identities should complement rather than duplicate one another.

9. Labs — /labs

Hero: Some ideas need to exist before they become products.

Document experiments, prototypes, research and lessons learned.

- ALINET — Creative talent network — Building
- REVIVE — Autonomous revenue recovery agent — Experiment / Build
- StockVision AI — AI-powered market intelligence prototype — Experiment

Status system

- Live
- Building
- Exploring
- Archived

Experiment structure

- Problem
- Idea
- Status

- Technology
- What we learned

10. About — /about

Hero: We're building a company for the AI-native era.

AI is changing how products are built, how companies operate, how creative work gets produced and how people discover opportunities. Blualien exists to build at that intersection.

Ecosystem logic

- Products → equity / value creation
- Studio → revenue / cash flow
- Distribution → attention
- Network → talent / opportunity
- Labs → experimentation / future products

11. Blualien Flywheel

Everything we build should feed something else.

BLUALIEN → PRODUCTS → PEOPLE → DISTRIBUTION → ATTENTION → STUDIO → CUSTOMERS → NETWORK → TALENT → PRODUCTS

Use a clean visual loop to communicate that the ecosystem is connected rather than a collection of random projects.

12. People — /people

Keep this page honest and minimal.

- Founder — Rushil Gara
- COO — [Name]
- Future team members

Profiles can contain role, focus, short bio and relevant distribution links.

13. Careers — /careers

Hero: Come build with us.

We're early. That means you won't be joining a finished machine. You'll help build the machine.

- Creative
- Media
- Product
- Engineering
- Growth

- Operations

Every role should show: What you'll do; What we're looking for; Why it matters; Compensation; Remote/location; Apply →.

For unpaid roles, compensation status must be explicit and transparent.

14. Build With Us / Contact

Hero: Have something worth building?

- Company → Work with Blualien
- Creator → Build with Blualien
- Builder → Join the team
- Investor / Partner → Start a conversation

Contact form

- Name
- Email
- Company
- Interest: Creative Studio / Growth / Website or App / ALINET / Partnership / Hiring / Media / Other
- Message
- Send →

15. Proof / Trust

Do not use fake agency proof such as '500+ clients'.

- Products shipped
- Experiments
- Client work
- Content
- Hackathons
- Open-source projects
- Case studies
- User milestones

Only display numerical proof when real and verifiable.

16. Journal — /journal

Position this as What we're thinking about, not a corporate blog.

- Why AI makes expertise more valuable.
- Why we're building ALINET.
- What we learned trying to get our first client.
- Why we're not building another AI wrapper.
- What we learned from creative interviews.

- Building a company at 19.

17. Footer

BLUALIEN — Building what comes next.

- Company: About, People, Careers, Contact
- Build: Products, Studio, Labs, Work
- Media: Alien's Orbit, @thegararushil, Beyond 100X
- Social: Instagram, YouTube, LinkedIn, X, GitHub

© 2026 Blualien • Made by Blualien

18. Visual Design Direction

Overall feeling: Premium minimal technology company + editorial media + experimental AI lab.

- Black / white / deep blue
- Large typography
- Generous whitespace
- Subtle gradients
- Thin borders
- Sharp restrained cards
- Micro-interactions
- High-quality motion
- Occasional futuristic elements

Avoid

- Purple AI gradients everywhere
- Glowing brains
- Robot/alien illustrations
- Excessive glassmorphism
- Generic 'the future is here' copy
- 3D blobs everywhere
- Generic SaaS dashboard aesthetics

Reference feeling: Apple × Linear × high-end editorial magazine × experimental technology lab.

19. Exact Homepage Sequence

6. Hero — Building what comes next.
7. What is Blualien? — Products / Studio / Distribution / Labs.
8. What we're building — ALINET.
9. What we're working on — Current experiments/products.
10. What we're creating — Studio work/case studies.
11. What we're thinking about — Orbit + Journal.
12. Who is building it — Founder + COO + team.

13. Come build with us — Company / Creator / Builder / Partner.
14. Footer — BLUALIEN / Building what comes next.

20. Strategic Website Principle

Do not let the website make Blualien look like a service agency that happens to have startup ideas.

15. Blualien is a company.
16. Blualien builds products.
17. Blualien builds media and distribution.
18. Blualien builds creative systems for companies.
19. Blualien experiments through Labs.

Services should be presented as the Studio business inside Blualien—not as the definition of Blualien.

21. Final Company Model

BLUALIEN = COMPANY

PRODUCTS = EQUITY / VALUE CREATION

STUDIO = REVENUE / CASH FLOW

MEDIA = DISTRIBUTION / ATTENTION

NETWORK = TALENT / OPPORTUNITY

LABS = EXPERIMENTATION / FUTURE PRODUCTS

22. Final Brand Definition

Blualien is an AI-native company building products, creative systems, technology and media around the technologies reshaping how people work, create and build.

Short brand line: Building what comes next.

23. Launch Checklist

- Finalize brand typography and visual system.
- Build homepage and primary pages.
- Add accurate ALINET status.
- Add Studio services and real case studies.
- Connect Orbit and founder distribution.
- Create Labs status system.
- Create About / People / Careers / Contact.
- Add analytics and basic SEO.
- Verify every numerical claim and portfolio result.
- Test mobile, tablet and desktop.
- Test every form, CTA and navigation path.

- Ensure the site feels like one company rather than unrelated projects.
